

Appln. No. 09/775,677  
Amdt dated May 30, 2003  
Reply to Office action of August 28, 2002

Amendments to the Specification:

Replace the paragraph beginning on the page 4 line 1 with the following new paragraph:

Annuloplasty rings are needed to achieve a durable reduction of the annular dilatation. All the common rings are sutured along the posterior mitral leaflet adjacent to the mitral annulus in the left atrium. [The Duran] One ring encircles the valve completely, whereas the others are open towards the anterior leaflet. The ring can either be rigid, like the original [Carpentier] CARPENTIER annuloplasty ring, or flexible but non-elastic, like the [Duran ring or the Cosgrove-Edwards] COSGROVE-EDWARDS annuloplasty ring.
